WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Sunday evening will see an increase in precipitation from west to east beginning in the western Valley and Delta region.
- · Wet weather will return next week with multiple chances for heavy precipitation and gusty winds.

SOUTHERN CALIFORNIA

- · Lingering showers will continue to dissipate this evening.
- · Daytime heating could cause scattered heavy showers and thunderstorms.
- The threat for flash flooding and debris flows is minimal.
- Snow levels dropping to 4,500 to 5,000 feet for the majority of the day.

Key Points

01/12/19 - 01/18/19

Saturday

- Rain and isolated thunderstorms across southern CA during the morning hours
 - Locally heavy rain with potential minor debris flow impacts along with rock slides over southern CA
 - Snow levels down to 5000 feet and may impact travel
- Dry conditions by Saturday afternoon and night

Sunday

 Dry conditions across the state through much of the day. Next round of rain will start move in late Sunday night

Monday-Thursday

- High confidence on a very wet pattern as several storm systems will move across the entire state
 - Possible impacts include debris flows across recent burn scars, significant travel impacts over the mountains due to snow, urban flooding, rock slides and localized power outages due to gusty winds
 - Confidence is high on the wet weather but low on exact location, timing and significance of any impacts

Friday

Drying conditions across the state with no significant impacts
